

Seminar on SYKE's future scenario and foresight work 15.5. 9.30 – 11.30 in Muuttohaukka (or in virtual room 1.)

Many ongoing projects (at least 27) at SYKE are engaged in future scenario and foresight activities. The timeframe of the foresight varies, some focus on just some years many are looking towards 2030 and some even to 2100. The Scenarios cover a large amount of issues from the impacts of climate change to urbanization and many different methods and approaches are utilized in the projects.

If you are interested in getting more knowledge about SYKE's scenario and foresight activities and in influencing the future of our foresight work, register in SYKE's training system and participate in the seminar on May 15th 9:30 – 11:30 in Muuttohaukka or in virtual room 1.
